

Cellular and molecular biology

Large and capital Equipment

Flow cytometer with cell sorter

Atomic force microscope for biological application

Extracellular analyzer

Phase contrast / invert microscope

Confocal microscope

Phase contrast / inverted microscope with fluorescence

System for karyotypization

Microscope for cell analysis configuration 1

Microscope for cell analysis configuration 2

System for microscopy - Configuration 3

System for microscopy - Configuration 4

System for microscopy - Configuration 5

System for microscopy - Configuration 6

Autoclave

Small Equipment

Refrigerator combined up to 400L

Microwave oven

Sterilizer 110 L

Sterilizer 55 L

CO₂ incubator 48L

Incubator 60/80 L

Shaker and incubator for bacteria

Incubated shaker

System for laboratory labeling

The trigger for the micropipette

Guillotine for small animals
